DETAILED ACTION

Drawings

1. Figures 1-12 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Election/Restrictions

2. Applicant's election with traverse of fig. 16-19, claims 1-12, in the reply filed on 5-26-05 is acknowledged. The traversal is on the ground(s) that Figures 1-15 are merely components of the claimed device, not separate species that require an election to be made.

This is not found persuasive because, at a minimum, it is clear that fig. 15 shows a different embodiment than figure 14, which is different embodiment than fig. 13.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3651

4. Claims 7, 8, 10-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 7, 8, recite the limitation "said stem". There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 2, 3, 4, 5, 6, 7, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Lehtola USP 4768647. Lehtola discloses a similar device comprising a(n):

- Support (6) having a pair of joints (fig. 3 & 4) one of which joining said support (6) to said reciprocating tray (2), the other of which joining said support (6) to said base (12)
- Reciprocating tray (2)
- Resilient means (fig. 4) associated with either one of said joints
- Shank (6)

7. Claims 1-13, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Adams USP 2854130. Adams discloses a similar device comprising a(n):

Art Unit: 3651

- Support (fig. 2) having a pair of joints one of which joining said support to said reciprocating tray (1), the other of which joining said support to said base (6)
- Reciprocating tray (1)
- Resilient means (7) associated with either one of said joints
- Shank (8) connected to tray
- Socket (4, 5) connected to stem (3)
- Said Shank (8) received in said socket (4, 5)
- Driving apparatus (inherent if not disclosed)

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 14-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Adams in view of Tamlin Canadian Intellectual Property Office Demande-Application 2277508.

Adams discloses all of the claim limitations but does not explicitly disclose a driving means as claimed in claim 14 & 19, 14-23.

The inventor Tamlin teaches the driving mechanism as claimed (figures 1-12 in Tamlin 2277508 are prior art to figures 1-12 of the instant invention) for the purpose of providing for shaking a tray.

Art Unit: 3651

It would have been obvious to one having ordinary skill in the art at the time of the invention to have employed the driving means as taught by Tamlin, in the device of Adams, for the purpose of providing for a means to shake a tray.
